Gardening as a Hobby

Gardening can be a business or a hobby. As a business it requires a lot of knowledge, a lot of time and effort. As a hobby it can become a most pleasant, profitable and health-giving past time.

A small garden plot can produce a surprising amount of vegetables, if carefully planned and planted. Freshly picked vegetables from one's own garden cannot be excelled in quality and flavor.

Flowers have their value always as a morale builder, whether they are the tried and true standard varieties, or the newer novelties recently offered.

In our listing of vegetable and flower seeds you will find our selection of the standard sorts, as well as a few of the newer introductions.

May we help and advise you in your selection of seeds, fertilizers, plants and garden insecticides for your 1947 gardening season.
